

Introduction to Net weaver Technology

Introduction to SAP EXCHANGE INFRASTRUCTURE

- Work Method of SAP Exchange Infrastructure
- Architecture of Exchange Infrastructure

The System Landscape

- Software Components and Products
- Implementing Technical Systems
- Business Systems and the integration directory

Introduction to Integration Builder

Configuration Integration Repository

- Importing SWCV
- Creating Data Types
- Creating Message Types
- Creating Message Interfaces
- Message Mapping
- Configuring Interface Mapping

Runtime Workbench

- Runtime Workbench Overview
- Component Monitoring
- Message Monitoring

Configuring Integration Directory

- Introducing the Scenario
- Configuring Services
- Configuring Sender System
- Configuring Receiver System & Routing
- Configuring Communication Channels
- XI Message : Structure and Transfer to the Pipeline
- Logical Routing
- Mapping and Technical Routing

XI Connectivity

- HTTP Adapter
- XI Proxy Overview
- IDoc Adapter
- Procedure: Checking the Logical System Name
- Procedure: Importing an IDoc type
- Receiver IDoc Adapter
- Sender IDoc Adapter
- Sender IDoc Adapter
- Receiver File/FTP Adapter
- Sender File / FTP
- RFC Adapter Overview
- Receiver RFC Adapter
- RFC Sender Adapter

Business Process Management

- BPM Overview
- CcPM: Designing and Configuring Integration Processes

Exercise Of Scenarios

- File to File
- File to Idoc
- JDBC Connectivity
- RFC Communication
